

Multi-Regulator Air Stations

These multi-regulator air stations are a great addition to your shop. Features two precision set points for clear and base coats, which allows the painter to be dialed in all the time and never have to adjust settings.

MRAS-C104-2XR
Air Station

MRAS-C104-2XR

Includes:

- 0-120 PSIG operating range for precision adjustment
- Large diaphragm provides constant pressure to gun
- .01 micron filter - excellent particulate and oil capture
- High flow regulators, up to 40 SCFM each
- 1/2" inlet and three 1/4" quick disconnect outlets
- Chrome case gauge w/ glass lens
- 60 SCFM filter with auto drain and drain tube kit
- Two additional full flow 1/2" NPT outlet ports available

Great addition to any booth with dryer package, captures desiccant dust and other contaminants coming from the dryer systems of any competitors.

MRAS-D401-2XR
Air Station

MRAS-D401-2XR

Includes:

- 0-120 PSIG operating range for precision adjustment
- Large diaphragm provides constant pressure to gun
- Patented RTi Desiccant Dryer, -40° F Dew Point
- Built in 1 micron final filter, no dust in your paint
- 1/2" inlet and three 1/4" quick disconnect outlets
- Chrome case gauge w/ glass lens
- 30 SCFM filter with auto drain and drain tube kit
- Two additional full flow 1/2" NPT outlet ports available
- Easy spin-on/spin-off desiccant cartridge, no tools!
- True moisture indicator and support bracket included

Great addition to any booth with single or combo filter system. Provides the dry air required by today's high tech waterborne finish systems. It's great for restoration/hobbyists and DIY's that want the best finishes.
